REVITALISING SERUM

Concerned about our consumers' reviews and the product efficacy, we asked 10 consumers, aged from 40 to 66, to test the product before launching it on the market. For 4 full weeks, the women rated their serum satisfaction daily before returning these results to speak for themselves:

The revitalising serum leaves the skin more supple and softer **100 %**

After 4 weeks, the skin is re-plumped, wrinkles and fine lines are reduced **90 %**

The product leaves my skin firmer, brighter, younger **8/10**

While applied, the serum does not leave the skin greasy or shiny **100 %**

Your feedback is important!

As you use our products on a daily basis, you are in the best position to assess their evolution, ergonomics, weaknesses etc. Our role as a manufacturer is not only to offer you products but it is also to offer you better products.

This requires the active participation of our clients in the development of some of our products: from the expression of a need to the validation of a perfume, taste, or texture. For these products, you are the judges of our creations before they are launched on the market.

Therefore if you receive one of our e-mails looking to find volunteers to test new products, please don't just put it in the trash. Rather see it as an opportunity to be involved in the process of creation of products that suit you.

Even if the product is already on the market, do not forget us! We are always listening to you, and since 1979, many products from the Propolia® range have been improved thanks to your comments and the flexibility of our small production lines (many lines are not produced in quantities bigger than 150 units per month!).

And of course, if you like our products, do not hesitate to let us know: we are also very fond of and appreciate your compliments! Our comments guestbook on the website propolia.com is here for this very purpose. We can only look forward with eager anticipation to your "nice words"...
